ICECS is an international conference dedicated to circuits and systems, held annually in Region 8 (EU, Africa and Middle-east). The 27th edition of this IEEE Circuits and Systems Society Region 8 flagship conference will take place in Glasgow, Scotland, United Kingdom.

The scope of the conference will focus and not limited to:

- » Analog/mixed-signal/
RF circuits
- » Biomedical and Bio-Inspired
Circuits and Systems
- » EDA, Test and Reliability
- » Digital circuits and systems
- » Linear and Non-linear Circuits
- » Low-Power Low-Voltage Design
- » Microsystems
- » Neural networks, Machine and
Deep Learning
- » Sensors and Sensing Systems
- » Signal Processing, Image
and Video
- » VLSI Systems and Applications

To implement the above vision, this year's conference will highlight the following disruptive themes:

- » Society 5.0 - Human-centric
Society
- » Sustainable Computing
and Systems
- » Energy-aware Systems
and Services
- » Nanosatellite and smart IoT
- » Smart Systems for Automotive
- » Lab-on-CMOS, Wearable and
Implantable Devices

A selection of the top accepted papers will be invited to submit an extended version for Journals supported by IEEE Circuits and Systems Society.

SUBMISSIONS

The technical committee invites authors to submit 4-page papers in standard IEEE double-column format, including references, figures and tables, to clearly present the work, methods, originality, significance and applications of the techniques discussed. Accepted papers will be submitted for inclusion to IEEE Xplore.
